em railroad officials have been interviewed con
coming the proposed railroad trust and the gen
oral situation to the transportation interest. As
much as the opinions collected differ as to details
and ministy in tracking a general conclusion not
office found among railroad officials. Managers
are not all ready for a railroad trust, and some of
them sumplatically oppose such a core
bination but the tenor of their remarks
against a indicate that they are all
looking forward to a stronger federallon
among the transportation industry from the

His cipetions to the formation of a trust can be trought under three heads. First-No practical working plan can be devised on account of the grout diversity of interests involved. Second—He cannot see the first of the first and the first of the lattestant commerce have and the law of the different states against consolidating. Third—The American people would not suffer a milroad trust to exist. He does not looks to get a most of his colleagues. He does not looks to get as most of his colleagues. There has, in his opinion been too much railroad building and the interestale law has given managers some awfully design cashe problems to active but he thinks that the jubic will discover that its hos table to railroads has been pushed to an injust there and a Fwalker of the interestate com

OLYMPIA July 23—About 10 o clock this even ing the residence of Mr. Out on Washington Street, was bruken into and a lot of jewly stoke. The articles belonged to a man named Williams who recently arrived here from Southe and who had lost all he had in the fire in that city except the little stock he broughthere for saic. Had the police been found when the robberty was discovered, the their could castly have been captured, but a good deal of valuable time was lost, and the fellow casped. So many robbertes have recently taken place here, and no arrosts, that tarpayers are considering the question of appealing to the city council for relief.

Chico, Cal July 28.—Large forest fires are raring on the Humboldt road eighteen miles from Chico. The fire has burnt over a district of four miles in length and is sweeping everything before it. Much valuable timber has been destroyed. People are fighting the fire, and expect to get it under control to-day.

IN IDARO

Boise City, Idaho, July 29.—Forest fires are sweeping the country about Banner, Idaho, destroying one of the finest belts of timber in that territory. The timber is so dry that the fires are liable to spread over a large part of the country. Governor Shoup has telegraphed the secretary of the interior asking him to aid in extagguating the fire.

DENVER Colo, July 29—All yesterday and to day a heavy, smoky atmosphere hung over Donver, giving the sun the appearance of a red bail of fire. Information received from all parts in the state, Wyoming Northern New Mexico, Western Kansessand Nebraska indicate that the same condition exists. As it is too early for the Indian summer an impression is created that it is caused by immonse forest fires in the Rocky mountain, probably in Montana.

Driver July 29—A telegram from Gunnison Col shys For two or three days the mountains in this vicinity have been ablaze with burning timber. Her was discovered Friday afternoon list at the head of Lost guich. To the north of the guich fire was seen raging along the top of a well timbered mountain. The air was dense with black smoke, and on the following morning, when the sun rose, it looked I ke a ruby setting in a dark sky. Yesterday afternoon smoke was again seen rising from the Marshall pass district and later it was learned from passengers of the west bound train that the timber was after below Showano. The supposition is that it was started from sparks from passing locomotin.

CHARACTER, + INTELLIGENCE, + STRENGTH.

To develope these three is the true aim of a great school. Life is earnest. and whoever hopes to reach the highest success must have first the solid foundation of a true manly or womanly character, based upon the love of truth, foundation of a true manly or womanly character, based upon the love of truth, honor and uprightness, next, intelligence to comprehend the great and important facts of life, with their relationships to one another, and last, but not least, strength of body to enable him to bear his work lightly and well. The test of a school's work is the success of its students. Every county in the state can bear witness to the influence of the Normal. Both graduates and students are doing honest, effective work in the public schools and in almost every department of business. Twenty-sight counties sent students has year and in a graduating class of thurty seven members fourteen counties were represented. Honest and earnest effort is the secret of success.

The Oregonian.

"SOCIETY AT FAULT."

THE OBECOMIAN has remarked that it is not particularly in love with the suggestion of those pseudo humanitarians who since thoy can't prevent society from hanging its they can't prevent sometry from about the numberers, are trying do bring about the adoption of rock-moto-discr-mother-moth ods of executions, so that the murdajor will seve nothing to dread on the score of pain It thinks haughing quite good enough for underer, and questions whether the muderer has any separalities which ought to be consulted in the matter. But there is a newspaper in Eastern Oregon conducted by a man of unarranged intellect which says THE OREGONIAN IS too think skinned to see that the errors of seciety breed murderers therese cruel brutal creatures heartless unfceling people just the same as corruption nd fifth breed maggots lice and bedbugs The uncleanness of society caused by an un just social system is the cause of all the crime and paid on the earth. When hamanity grows humane enough to correct this error THE OREGOVIAN editor will not be called up on to exhibit himself in print as an unfeeling, heartless cruel monster

The doctrine that ' an unjust social system is the cause of all the crime and pain on earth has no little fascination not only for criminals, but for many persons of shall w minds who are not criminals. It be low minds who are not criminals shirk and escape personal responsibility
that have little or no sense of individuality and have a distinct tendency to anarc Men, moreover who have a theory that so ciety ought to do everything for them leav-ing them little or nothing to do for them says seem more or norming to do for them selves, are naturally inclined to an effort to throw upon society the blame of their own failures and of the crimes they may commit Such siwars think themselves more sinned arminel these security.

The East Oregenian of Pendleton the journal from which the above statement is taken evidently regards the varabond who is too lazy to work, who tries to live by prey, and is arrested for theft as a victim of an unjust social system? Likewise the worth less or brutal fellow with whom no wife could live, and who therefore declares mar riage a failure is a victim of 'an unjust so call system and if he murders the woman every hedy but himself is to be blamed for the act. Society is at fault 'there is no such thing as individual responsibility and the man who intimates there is or should

be is 'a heartless, cruel monster There was a period beginning some fifty years ago which was very fruitful in a surj Rierature that supported these ideas. But this literature, after a run of twenty or tourty years began to decline during the last twelve or hiteen years its decline has rears ago which was very fruitful in a silly been rapid and now only it is kept alive by persons of unarranged intelects who in toxicate themselves with the lees of it. The texts are Society is at fault an unjust social sy tent is the cause of all the crime and pain on earth men are oppressed by society and driven to despair 'ev lience the a priors argument is that the thief must not be blamed and even the ravisher and murderer ere not criminals have done and to punish them is monstrou The argument is too wild for bal lam but might do in the kingdom of it archy as a meetra of clusting the inhibit tails to exter it tale each other

AEB GOSPEL OF PATPLANTISM

Boston's latest intellectual movement has taken the form of advanced socialism under the inspiration of Looking Backward a movel by Mr Edward Bellumy and it is not unlikely that the public discussion of the book in that city will win for it that which the crit cism of Mr Cladstone achieved for "Robert Elsmere namely a wide circle of

thoughful readers
Without the stimulus given by Colonel T
W Higgmeen the Rev M J Savage Mr
William D Howells the Rev Dr Edward Everett Hale and others representing the advanced culture of New England, the book would be valued for whatever literary ment it possessed the ideas of social revolution which it is an exponent would not either or which this the exponent would have suffi-be entertained or discussed. But when emi-nent men approve these theories establish societies for the promulgation of the ideas and publish a magazine to extend them it becomes necessary to examine the theories and see whether or not they stand the test of logical expediency The theories taught by Mr Bellamy s book

No man shall be better than he All who are able to work shall wided with labor best suited to their capacity and the proceeds of this toil to be so divided that there shall be equality of income All, competition is to be abolished individual lam is to be suppressed every citizen shall attend public school until the age of 21 ev ery man shall work until he reaches the age of 40 after which he must be pensioned There will be no crime poverly legislation or politicians. These and other projects of like nature the inthor seeks to teach. The whole questi n is summed up by Colo icl Higginson who says Modern inc de mands organ zed business action. There are two great organ zations either one of which can manage it organized civit i or organ ind government. It this be the real after native there is certainly an in reasing num ber of people who would prefer to tru t the

government
This form of socialism is purely a figment of the neighbor It has no protoil worth and if it can dibe nade to comeater up control business enterprise should ever bu narrowed down letween corporation and ove nment the former would be the more gove ament the former wount be the mora universally preferred. In all the his ory of railroad legis almo 'it I as been neoriest by demonstrated that the government cannot manage railways successfully and honestly whereas under the form of corporate to operation the greatest material triumphs of the age have been achieved. The state has all it can do to transact properly its present func-tions. Rathroads telegraphy, farming and merchandise should never be managed by the government and as long as the republic lusts never will be so contro led

But this theory of reducing all men to equal condition can it be made to apply practical v to our American life? To beg n_q what is the reason of our rapid national de relopment? The simplest answer that can be given is the incent vel eld forth to indi with all industry the rewards to be guided and the power to be attained through the medium of the elevants. From if the law of compulsory discatton could be enforced so that each individual was possessed of equal educational advantages the law of nature reveals the fact that one would profit and others derive hitle benefit there from Some would be intelligent a dotters would be more or less fools. Some would lead and others would follow. Some would lead and others would follow. work and others play and in ageneration or less some would beg and others steal. The theory mu t not only give all man an equal start, but it must be so fortified as to keep them so, and therein is shown the utter futility of the idea, and that which is in tended to cause more equity in the world would work the greatest injustice that rightcous men have ever suffered. The in-tellectual and moral grant would be doomed to the same life as his mental and moral in-ferior, and deprived of those superior ad-vantages to which he is entitled by every gamespie of unitural equity. The end of it

THE INTERNAL REVENUE

The internation from many sources that The internal revenue taxes on whish and tobacco will probably be repealed by the next congress is probably well founded Able republican leaders, like Witham D Keney in the house and John Sherman in the senate have long lavored the repeal of these taxes and the Randull faction of the democracy will be sure to vote for this

The Landall democracy have always ar gued that 'tv_rv man who proposes to keep up the internal revenue system is a free trailer and opposed to the doctrine of defler son' kandall points out that when the internal debt is paid off as it will be in twent) veirs the revenue from the internal taxes will amount to the regular government expenditures, and hence to maint in the internal revenue means the abolition of the tariff and the adoption of free trade ferson while pre-ident aboushed the inter-nal faxation which had been laid to support the Revol tion and the sume policy was adopted afterward by President Montoe under whose administration the internal revenue that had been established in and of the war of 15 2 was wiped out with the return of pence The internal revenue tax was aguin imposed during our civil war but to day both republican and democratic protection

1sts de tre its extinction
But there is a special reason why the re I ublican purty will be likely to favor the repeal of the liquor and tobacco tixes and that is because they may not otherwise be able to hold the vote of the bouthern repub heans Brower the regulation member from the Lifth North Carolina district in sists on the abolision of the internal revenue system and so does his democratic col-leng is Pwirt. The democratis have always promised North Carolina to repeal the in-ternal rovenue system the moment they had the nower and they have not kept then Mr Brower has raised the banner of absolute abolition of the internal revenue and boasts that if one half the seventeen re-publican representatives from the South and the border states stand to ether ther can compel the republicans to agree to aboush the internal revenue or turn over the whole organization of the house to the democrats Brower declares that if the republicans do not about the internal revenue he is ready to go over to the democrats and says that if he succeeds in also ishing the internal rev enue his people will re elect him as an in dependent. The rejublican members from Tennessee will support Brower in this deter

mination to repeal the internal revenue We suppose the internal revenue taxes will have to go and yet we would be glad to see the taxes on liquors and tobacco main tuned so long at least is large revenues are required. But it is clear that the country will not maintain them and sacrifice pro on liquors and topicco are repealed the at tes can still tox these commodities to their hearts content. But the states would not be likely to enforce the taxes and we would prefer to see them continued by the general government and the revenue used in and hurbors and executing of er julie the uperintendent feels confect that the works that the country urely

THE METHOD OF MINION

Francis Marphy of litt burg is one of the createst of the temperance aposiles of our day. During many years he has given blusself up who ly to the work of temperance and reform. His method is to make men masters of themselves and he waster no time trying to keep them from armking by law Hence he is not a probibitionist. I rom one of his recent addresses we qui to this par

BREEZES OF THE OCEAN. Midsummer at Clatsop, Ilwaco and North Beach.

The Hotels and Cottages Filling Un Rapidly Under the Pressure of the Het Weather-A List of the People at the Beach.

CLATSOF, Or, July 28.

The season is backward here, when compared with Hwaco and Long Beach. The weather has been pleasant, however, for some time, and to-day it is perfect. The air is warm and haimy, the heat of the sun being tempered by a gentle breeze from off the ocean old Titlamook head stands out clear and distinct no smoke or haze mars the deep color tones if the fir covered hills, and the clear waters of Nekanikan flow over the broad pebbly bottom with a pleasant muste that blends harmoniously with the more promonanced roar of the surf on the beach beyond, and all nature seems to woo the pleasant seeder to an hour with Morpheus Justead, however the rumble of wheels and the hourse dusty cry of the Jehn bidding his tired animals "whon," breaks the spell, and the guests flock one and all to the broad verands of the Sea side hours and watch Meinherr Epperly welcome a stage load of guests. As intimated before, he wever the stage loads have been few and far be tween as 9.1, and barely forty people are at the Beaside and not over stry at trimes s. CLATSOP, Or , July 28.

He Had the Information and He Made the Heir Pay for It - A Misleading Article Published in the "World."

Richard Walker, the young Australian had a hard time of it finding out where the estate of his mother was located. Telegraphic advices have been sent from this city to his autorney in New York, and by this time he has been informed that his mother died in Tacoma, and that her property is located there.

John A. Carr, the Portland broker, whose place of business is at 91 Washington street, led young Walker a morry chase for a time. His name was tolegraphed here as John B. Carr, but there it no person of that name in the city. Besides, it is known that John A. Carr is the East. The dispatches say that young Walker has agreed to give Carr 40 per cent. of the state in constituration of the information he had of the location of Mrs. Walker's estate.

Walker's estate.

A reporter called at the law office of W. Scott

Jonate Inter-which has been received from Mr. Bernhaum. It throws additional light upon Carr's conduct.

A HARD MAIN TO DEAL WITH.

NEW YORK, July is, 1889.

Mannions & Emmons—Dear Niss: Your favor of the std inst. has just been received. After the rescript of your telegroup of the 12th I had hoped that you had learned where the estate was located and he facts so occuring it.

It is useless to you to await Carr's return or to expect any information whatever from him. He has been in New York during the with him. He has been in New York during the with him. He absolutely re had several of the whole with him. He absolutely re had several of the whole with him. He absolutely re had several of the whole with him. He absolutely re had several to the reflect of the amount. He says she left a will which has not been probated, by which size left her estate to her son, Richard Walker, hy elitest, provided he should come forward and chain it within two years from the time of her death, and an easo of his failure to do so that then It should go to her brolbers and sisters in Irchard, whose hances are Lyons, sometimes spelled Lines.

Carr anyshe knows where this will is, but will not say where, and claims by means of shome "hoous, pooling" in the him to explain, leading the fact that the le will not explain. Some him to be able to get the money for my call the will in take bess. He alm his ton the article in the Uridia a copy of which was sent to you in my first letter, was inserted by him, but asys that it purposely misstates the facts, his sole object being to find Michard Walker. In this respect, he doubless tells the truth, for a careful investigation at Kansas City has failed to discover any each estate. Mr. Beebe, I am thoroscily convinced, knews all about the matter. On becomber 19, used, Carr telegraphed from this city to Bede as follows: "Fixed Only James, Richard to Alstralia. What will lead to the other of and the father of

"Fixed James; accease to will low;" The James referred to in this telegram is James Walker, the husband of Annie and the father of Richard. Carr has told use that his attorney in the Western city when the state is located, knows all the facts, and has full charge of the matter, and this telerarum would seem to indicate

that Breeds is his naturally on her business in Your city for any length of time, she must have been known to the police, and it seems to not that you might through them be able to tocate let, inserting the police in the protocraph. All hands want?earline—it s handy

Enables one pair of hands to do the work of several; millions of hands use it; millions more will when they learn its calue.

You can read, write, sew, wash dishes, prepare the meals, care for the baby-with your two hands, while Pearline is washing the clothes for you almost without the aid of i ruds. It's harmless; cannot hurt most delicate of kands or lab.ics; most delightful for washing the hands. It saves your hands one-half the work in house-cleaning—in fact, when your hands have anything to wash or clean you will find cooner or later that Pyle's Pearline is the best thing known with which to do it.

Many hands are engaged in peddling imitations of Pearline—or goods which they claim to be 'as good as Pearline." IT'S FALSE—Fearline is not peddled.
